The Department of Sociology presents the
Balakrishnan Distinguished Lecture in
Population Dynamics and Inequality.

Occupational and Income Mobility in the USA, 1994-2016: Demography Counters Inequality

Thursday November 2, 2017

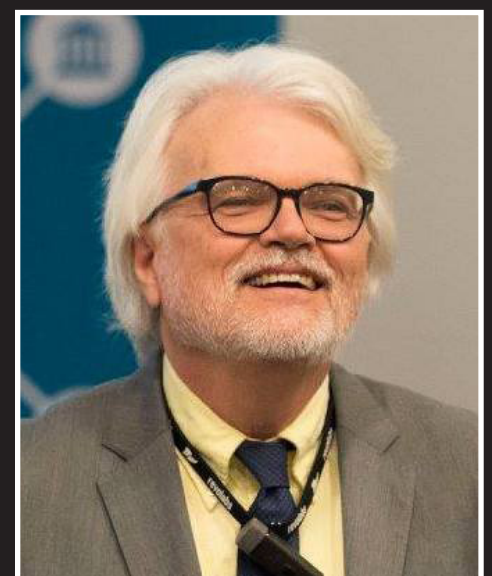

2:00 pm - 4:00 pm

McKellar Room, University Community Centre

Reception to follow at The Wave

A lecture by Dr. Michael Hout

Professor of Sociology at the New York University. Hout uses demographic methods to study social change in inequality, religion, and politics. He is co-principal investigator on the General Social Survey (GSS), a long-running NSF project. His current work uses the GSS to study changing occupational hierarchies and social mobility since 1972.
