Family benefits in cash, services and tax measures
Public spending in % of GDP in OECD countries, 2009

F. Héran, Ined
3 types of public spending on family benefits (OECD harmonization)

- Child-related cash transfers to families with children
  - Child allowances (sometimes income-tested),
  - Public income support payments during periods of parental leave
  - Income support for sole parents families
  - Child tax credits that are paid out in cash to recipients

- Public spending on services for families with children
  - Direct subsidising of providers of childcare and early education facilities
  - Childcare support through earmarked payments to parents
  - Assistance for young people and residential facilities
  - Family services, including centre-based facilities and home help for families in need

- Tax expenditures towards families
  - Tax exemptions
  - Child tax allowances (not included in taxable income)
  - Child tax credits
  - Amounts deducted from the tax liability
Enrolment of children aged under 3 in childcare (OECD)
Enrolment of children in childcare (under age 3) and pre-school (3-5 years) in 2010 (source: OECD)

F. Héran, Ined
Enrolment of children in childcare (under age 3) and pre-school (3-5 years) in 2010 (source: OECD)

F. Héran, Ined
- **EICT (US, Korea)**
  Earned Income Tax Credit

- **“Quotient familial” (France)**
  Tax-splitting system for family according to the nature and number of consumption units (concerns tax-payers only)

- Data: 18 OECD countries, 1980-2007
- Develops and discusses, among others:
  - Gauthier & Hazius (1997)
  - D’Addio & Mira d’Ercole (2005)
  - Gauthier (2007)
  - Myrskylä, Kohler & Billari (2009)
  - Kalwij (2010)
  - Sobotka, Skirbekk & Philipov (2011)

- Paid leave
- Childcare services
- Financial transfers

**Distinction between services and cash benefits...**
- Around childbirth
- In the 2nd and 3rd year after birth
- Ties with the following stage (3-5 years)
