Course Description:

This course examines a wide-range of classical sociological theorists. The main task will be to make sociological theory relevant to an understanding and appreciation of human society. More specifically, the primary goal is to help students to develop a way of looking at past and contemporary issues “sociologically”, and from a structural rather than individual standpoint. In doing so, we will discuss theory as a tool for organizing existing knowledge and as a means of generating “new’ knowledge. We will attempt to understand each theorist within their own time so that we can appreciate the specific social and historical contexts, which gave rise to their particular forms of theorizing. A constant theme that will be developed in the course is that of the complex relationships among ideology, social order, and social change. How are these themes reflected in various schools of thought? What are the origin of theories and ideas as they relate to the changing conditions of humanity?
