The University of Western Ontario
SOCIOLOGY 9007
Advanced Multivariate Statistical Analysis
Winter 2022
Wednesdays 9:30am-12:30pm
Classes in Room 5230 (Labs in SSC 1316A)

Professor: Dr. Rachel Margolis
Office Hours: Wednesdays 1-2:30pm
Department of Sociology, Office: SSC 5326
Email: rachel.margolis@uwo.ca

Course Description
This course builds on concepts you have learned in your introductory undergraduate or graduate
statistics classes. We will cover some of the most common statistical techniques in the practice of
quantitative sociology. These include multivariate linear regression, logistic regression, survival analysis
(event history analysis), and fixed effects models. We will discuss when and how to use these
techniques, as well as the assumptions we make when using them. We will also spend time discussing
various pitfalls and extensions to these approaches, including outliers, nonlinearity, multicollinearity,
and interaction terms. Throughout the course, we will talk about how to develop an answerable research
question, how to select the best modeling strategy for that question, and how to interpret the results of
quantitative analysis in light of our hypotheses.

We will apply these concepts in the computer lab. We will conduct data analysis using STATA, a
commonly-used statistical analysis software package. We will talk through basic issues that come up
such as dealing with missing data; saving data, code, and output; and making tables.

Finally, we will focus on writing about and presenting on a multivariate analysis of your choosing. A
major component of being a quantitative social scientist is the ability to clearly communicate what you
did, what you found, and why it matters. Your final project, which you should begin thinking about
early in the term, will consist of a paper and accompanying poster that includes the introduction, data
and methods, findings, and discussion sections of an academic article.

Learning Outcomes
1. Understand the assumptions made when using linear regression, logistic regression and survival
analysis.
2. Interpret key results from multivariate models.
3. Conduct analyses using Stata.
4. Critically evaluate published sociological research using the methods we cover.
5. Communicate about the results of your analyses.
Course Materials

Readings: There is no required textbook that you must purchase for this course. Recommendations for reference books you might find useful are listed below.

*Note: I am working with the UWO librarians to get as many of the readings available online before the term as possible. It’s my goal that you won’t have to spend much (any?) money on books.*

Books you may already own from Introductory Statistics

These are good reference materials for your work

Books I recommend reading

The readings from the above textbooks listed in the course schedule are optional but highly recommended. The empirical example readings, sociological articles that use the techniques we learn, are mandatory. These will be available on OWL and they are listed on the day by which you need to have read them. We will spend a portion of most classes discussing how the methods are used in them.

Stata: Throughout the course, we will practice using the statistical package Stata. While you are welcome to purchase your own copy of Stata, you should not need to. There are some funds available in the department to purchase statistical software (Contact Sandra). Stata is accessible on your personal computer using MyVLab (follow the set-up instructions at https://myvlab.uwo.ca/). While Stata is not on the list of available software at this website, you should have access to it as a Social Science student through a shortcut on the MyVLab Desktop.

If you would like to use Stata in one of the Social Science computer labs, you should have a computer account with SSNDS. In order to access Stata in the lab, students must: (1) have active Western accounts, and (2) have subscribed to “Western Identity Manager” and synchronized their passwords through the “Profile” tab. If you are having trouble gaining access, please call either the SSNDS main office (519-661-2152) or the ITS Help Desk (519-661-3800)
Methods of Evaluation and Breakdown

- Midterm exam (30%): February 16 in class.
- Poster Presentation (20%): April 6 and April 13.
- Lab assignments (15%): Due at the start of class the next week.
- Empirical Research Paper (35%): Due April 21 at 4pm.

A Note About Attendance: Because you cannot actively engage with the materials and your colleagues if you are not here, in order to receive a passing grade, students are expected to attend at least 80% of the class meetings for this course. This requirement will only be waived in exceptional circumstances with documentation. While attendance is not an explicit part of the evaluation breakdown, you will see your final grade lowered if you miss an excessive number of class sessions. Please inform me as soon as possible if you are unable to attend a class for medical or personal reasons.

How to Contact Me
If you have questions about the course content or logistics of the course that could be useful to the rest of the class, please post them to the Forum on OWL. If you have specific questions for me, I can be reached via email at Rachel.margolis@uwo.ca. Students are encouraged to come to office hours.

How to Get Important information
You will find course content and announcements posted to our OWL website. I will also announce any upcoming deadlines or changes to the course schedule in class.
Draft Course Schedule and Readings

January 5: Introduction

January 12: Linear Regression I

• Methods readings: Choose one of the following three.
  o Gordon textbook Chapters 5 (Basics Concepts of Bivariate Regression), Chapter 6 (Basic Concepts of Multiple Regression), Chapter 7 (Dummy Variables).
  o Allison, Paul. Multiple Regression: A Primer.
  o Agresti and Finlay (4th ed) Chapters 9 (Linear regression and correlation), Chapter 10 (Multivariate relationships) and Chapter 11 (Multiple regression and correlation).

January 19: Linear Regression II

• Methods readings: Choose one of the following two.
  o Gordon textbook Chapters 8 (Interactions), Chapter 10 (Indirect effects and Omitted Variable Bias), and Chapter 11 (Outliers, Heteroskedasticity, and Multicollinearity).
  o Agresti and Finlay (4th ed) Chapter 14 (Model building with Multiple Regression).

• Lab #1 this week

January 26: Logistic Regression I

• Methods readings for this week and next week: Choose one of the following two.

February 2: Logistic Regression II

• Methods reading: See readings from February 1.

• Lab #2 this week

February 9: Multinomial and ordered logistic regression

• Methods reading: Long. Regression Models for Categorical and Limited Dependent Variables. Chapters 5 and 6

• Lab #3 this week
February 16: Midterm exam

February 23: No class – Reading Week

March 2: Event History Analysis (1)

March 9: Event History Analysis (2)

March 16: Lab – Working with Panel Data

March 23: Instrumental Variables

March 30: Fixed Effects
- **Methods reading:** Allison, Paul D. Fixed Effects Regression Models. SAGE little Green book Chapter 1.

April 6 and April 13: Poster Session and Select Topics

April 21: Empirical research paper due at 4pm. Submit via Owl (under Assignments)
Important Policies

Assignment Deadlines. Students must submit their assignments by the date and time stated in the course outline and on the OWL website. Late final papers will be penalized 5% points for each day they are late.

A Note on Plagiarism

Students must write their assignments in their own words. Whenever students take an idea from another author, they must acknowledge their debt both by using quotation marks where appropriate and by proper referencing such as footnotes or citations. Plagiarism is a major scholastic offence. See Scholastic Offences (below) for the link to Scholastic Discipline regulations.

Plagiarism Checking

All required papers may be subject to submission for textual similarity review to the commercial plagiarism detection software under license to the University for the detection of plagiarism. All papers submitted will be included as source documents in the reference database for the purpose of detecting plagiarism of papers subsequently submitted to the system. Use of the service is subject to the licensing agreement, currently between The University of Western Ontario and Turnitin.com: http://www.turnitin.com

Scholastic Offences

Scholastic offences are taken seriously and students are directed to read the appropriate policy, specifically, the definition of what constitutes a Scholastic Offence, at the following web site: http://www.uwo.ca/univsec/appeals_discipline/index.html

Accommodation

Western is committed to achieving barrier-free accessibility for all its members, including graduate students. As part of this commitment, Western provides a variety of services devoted to promoting, advocating, and accommodating persons with disabilities in their respective graduate program. Graduate students with disabilities (for example, chronic illnesses, mental health conditions, mobility impairments) are strongly encouraged to register with Accessible Education Western (AEW), a confidential service designed to support graduate and undergraduate students through their academic program. With the appropriate documentation, the student will work with both AEW and their graduate programs (normally their Graduate Chair and/or Course instructor) to ensure that appropriate academic accommodations to program requirements are arranged. These accommodations include individual counselling, alternative formatted literature, accessible campus transportation, learning strategy instruction, writing exams and assistive technology instruction.

Copyright of Lectures and Other Course Materials. Any materials created by the instructor (e.g., notes, handouts, summaries, slide, assignments, exams, etc.) are protected by copyright law and may not be copied or distributed in any form without the explicit permission of the instructor. Any non-authorized use of these materials constitutes an academic offence.

Completion of Course Requirements

Course requirements must be completed by the end of the term in which the course is offered (Fall-December 31; Winter-April 30, Summer-August 31). Only in exceptional circumstances may a student take additional time to complete the course requirements. In such a case, the student must first meet with the Graduate Chair to request permission to carry the incomplete. Medical documentation, where required, will be kept on file in the Sociology graduate program office. More details regarding incompletes are outlined in the Graduate Handbook: http://www.sociology.uwo.ca/graduate_handbook/course_information.html

Mental Health

Students who are in emotional/mental distress should refer to Health and Wellness Western for a complete list of options to obtain help: http://uwo.ca/health/mental_wellbeing/

Health and Wellness

As part of a successful graduate student experience at Western, we encourage students to make their health and wellness a priority. Students seeking help regarding mental health concerns are advised to speak to someone they feel comfortable
confiding in, such as their faculty supervisor, their program director (graduate chair), or other relevant administrators in their unit. The Wellness Education Centre (lower level UCC) assists students in finding mental health and other related resources best suited to their needs: [http://se.uwo.ca/wec.html](http://se.uwo.ca/wec.html) Western’s School of Graduate and Postdoctoral Studies’ Living Well website provides tips for thriving at grad school and other helpful information: [http://grad.uwo.ca/current_students/living_well/index.html](http://grad.uwo.ca/current_students/living_well/index.html)

Western provides several on-campus health-related services to help you achieve optimum health and engage in healthy living while pursuing your graduate degree. For example, to support physical activity, all students, as part of their registration, receive membership in Western’s Campus Recreation Centre: [http://www.westernmustangs.ca/index.aspx?path=ims#](http://www.westernmustangs.ca/index.aspx?path=ims#) Numerous cultural events are offered throughout the year. Also, we encourage you to check out the Faculty of Music web page [http://www.music.uwo.ca/](http://www.music.uwo.ca/) and our own McIntosh Gallery [http://www.mcintoshgallery.ca/](http://www.mcintoshgallery.ca/)

**Standards of Professional Behaviour**

It is the responsibility of all members of the Department of Sociology to adhere to and promote standards of professional behaviour that support an effective learning environment. These include:

- **respect for others** both in and out of the classroom through words and actions (be professional, fair, and respectful in interactions with people on-line and in-person; understand and respect differences among classmates and colleagues; avoid disrupting the learning environment; respect others’ expectations of confidentiality and privacy)
- **active engagement in learning** and commitment to quality (being prepared for classes; participating and listening actively to other; using technology and social media appropriately, striving to do your best)
- **personal integrity** (following through on commitments; doing own work)

Students should also be aware of the [UWO Student Code of Conduct](https://www.uwo.ca/univsec/pdf/board/code.pdf) found at [https://www.uwo.ca/univsec/pdf/board/code.pdf](https://www.uwo.ca/univsec/pdf/board/code.pdf)
