### **Course Description:**

This course examines a wide-range of classical sociological theorists. The main task will be to make sociological theory relevant to an understanding and appreciation of human society. More specifically, the primary goal is to help students to develop a way of looking at past and contemporary issues “sociologically”, and from a structural rather than individual standpoint. In doing so, we will discuss theory as a tool for organizing existing knowledge and as a means of generating “new” knowledge. We will attempt to understand each theorist within their own time so that we can appreciate the specific social and historical contexts, which gave rise to their particular forms of theorizing. A constant theme that will be developed in the course is that of the complex relationships among ideology, social order, and social change. How are these themes reflected in various schools of thought? What are the origin of theories and ideas as they relate to the changing conditions of humanity?

**Prerequisite(s):** At least 60% in 1.0 from: [Sociology 1020](#), [1021E](#), [1025A/B](#), [1026F/G](#), [1027A/B](#).

Unless you have either the requisites for this course or written special permission from your Dean to enroll in it, you may be removed from this course and it will be deleted from your record. The decision may not be appealed. You will receive no adjustment to your fees in the event that you are dropped from a course for failing to have the necessary prerequisites.

**Antirequisite(s):** [Sociology 2270A/B](#) and [Sociology 2271A/B](#) or the former Sociology 230.
